Eriez® Quick Ship Program for Vibratory Equipment is Experiencing Tremendous Success with Aggregates Processors

Erie, PA—Eriez® is reporting that their Quick Ship program for vibratory equipment is more popular than ever before, with a particularly high and ongoing increase in sales volume to aggregates processors. Through the [Feeders Fast](#) program, customers with approved credit can receive select Eriez feeder models within five days from order date.

Eriez designed the program to include a wide variety of feeders that address a broad range of capacities and applications. Vibratory/Screening Product Manager Rob Yandrick explains, “The program has grown continuously as customers who already trust Eriez for quality products recognize our ability to satisfy their urgent equipment needs.”

While Yandrick says the program is successful overall, he notes that the aggregates industry has been especially enthusiastic. He says, “When an aggregate plant needs a feeder to keep the plant producing, they almost always need it quickly. In these applications, time really is money.”

[Feeders Fast](#) offers nearly 40 feeder models. These electromagnetic vibratory feeders are AC-powered, making them very reliable and energy efficient. Feeders in this program are ideal for many industrial and process applications.

The most popular [Feeders Fast](#) models for aggregates are the [Hi-Vi Electromagnetic Heavy Duty Model B Feeders](#) as well as [Electromagnetic Bin Vibrators](#). Eriez Hi-Vi Electromagnetic Heavy Duty Vibratory Feeders can be utilized to convey abrasive products evenly and efficiently. These units are often used to feed material out of a hopper onto a belt or feed material to a crusher or screen.

[Feeders Fast](#) is part of Eriez’ Quick Ship stocking program, which includes the company’s most popular items, from grate magnets to vibratory feeders and metal detectors. All Quick Ship products are readily available for immediate needs. To learn more about Feeders Fast and other Eriez Quick Ship programs, visit <http://erieznews.com/nr448>.

Eriez is recognized as world authority in separation technologies. The company’s magnetic lift and separation, metal detection, fluid filtration, flotation, materials feeding, screening, conveying and controlling equipment have application in the process, metalworking, packaging, plastics, rubber, recycling, food, mining, aggregate and textile industries. Eriez manufactures and markets these products through 12 international facilities located on six continents. For more information, call (814) 835-6000. For online users, visit www.eriez.com or send email to eriez@eriez.com. Eriez World Headquarters is located at 2200 Asbury Road, Erie, PA 16506.
